

Brain SPECT imaging facility now in Florida.

We would like to inform you and your doctors that there is a new brain-imaging center located in Central Florida. NeuroSPECT of Florida is a nuclear diagnostic facility that utilizes SPECT imaging as a tool to help treating physicians and their patients in diagnosing or confirming many neurological disorders.

What is SPECT? (Single Photon Emission Computed Tomography) is a sophisticated Nuclear Medicine study that measures the blood flow and activity patterns of the brain. These images can assist physicians in making a more accurate diagnosis and treatment plan for patients with the following conditions:

- Anxiety Disorders
- Anoxic Brain Injury
- Bipolar Disorder
- Depression
- Dementia – Alzheimer’s Disease
- Epilepsy
- Neuro-Immune Dysfunction
- Psychological Disorders
- PTSD
- Stroke
- Toxic Brain Injury
- Traumatic Brain Injury

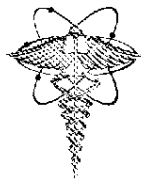

*Diagnostic Nuclear Medicine procedures interpreted by qualified Nuclear Physicians.

*NeuroSPECT of Florida is the only facility that is only an imaging center. Allowing all physicians the capability to offer this diagnostic tool in practice.

Please feel free to contact our office with any questions, or with requests for additional literature.
