**Re:** New EPCS Workflow

WRS Health is proud to announce the release of a new update to the system – a new workflow for e-prescribing controlled medications.

### ITEMS IN THIS RELEASE

New EPCS Workflow

Other Changes

## New Electronic Prescription of Controlled Substances (EPCS) Workflow

In compliance with migration to the National Council of Prescription Drug Programs (NCPDP) SCRIPT Standard v2017071, WRS has updated the workflow for e-prescribing controlled medications.

The new EPCS workflow is as follows:

1. We have removed the “Send Controlled Prescriptions” button. To send a controlled prescription, users must now select the “Send” icon.
  - a. We have added a “Schedule Level” visual cue to let the prescribing provider know what level the medication is for potential abuse. This is ranked I-V, “I” being the highest potential for abuse and “V” the lowest.

Current Note Prescriptions		Pricing Options	Administration Date	Cancel	Print	Delete	Send	Fax
<input type="checkbox"/>	Prescription							
<input type="checkbox"/>	Cotempla XR-ODT 17.3 mg extended release disintegrating tablet -> CVS Pharmacy # 5059 Place 1 tablet(s) by translingual route , on the tongue and allow it to disintegrate without , for 30 days , 30 Tablet & no refills <span style="color: green;">■</span> <span style="color: orange;">■</span> <span style="color: red;">■</span> <span style="color: blue;">■</span> Schedule Level: II							

Buttons: Represcribe, Move To..., Print Prescriptions, Send Non-Controlled Prescriptions, Fax Prescriptions, Send Counsel, Print Counsel

2. After selecting the “Send” icon, the user will be taken to the Prescription Preview page. The Prescription Preview page will now display additional information such as individual lines for Quantity and Unit of Measure, Schedule Level, and Vital Signs information.

## Other Changes

### Cancel Prescription Field Removed

Previously, there was a “cancel reason” field towards the bottom of the page. This has since been removed as it is no longer a requirement.

The screenshot displays a medical software interface with two main sections: a list of current prescriptions and a detailed view of a selected prescription.

**Current Note Prescriptions List:**

Prescription	Pricing Options	Administration Date	Cancel	Print	Delete	Send	Fax
<input type="checkbox"/> Prescription Suboxone 8 mg-2 mg sublingual film Place 1 film(s) by sublingual route , under the tongue until it is dissolved 1 time a day , 30 Film &refills: 1 Schedule Level: III							
<input type="checkbox"/> Prescription Suboxone 8 mg-2 mg sublingual film Place 1 film(s) by sublingual route , under the tongue until it is dissolved 1 time a day , 30 Film &refills: 1 Schedule Level: III

## NADEAN REQUIREMENT

Narcotic Addiction DEA Number (NADEAN) identification number is now required for clinicians to prescribe controlled medications for opioid dependency treatment. The NADEAN ID is entered in Administration > Resource Management > General.

**Please Note: Non-compliance will result in the prescription NOT being sent to the pharmacy.**

TAXONOMY CODE: 207RN0300X [Internal Me	DEA NUMBER: (mandatory for ERx and Formulary checking)	NADEAN: <input type="text"/>
--	--	------------------------------

## GHB Prescription Reason: REQUIRED

When prescribing GHB medication, documentation of medical need for prescription is required in the NOTE TO PHARMACIST field in the following format: **GHB:reason.**

**Please Note: Non-compliance will result in the prescription NOT being sent to the pharmacy.**

The screenshot shows the 'Add Prescription / Medication' interface. The drug is 'Xyrem 500 mg/ml, oral solution'. The dose is '3 times/day', route is 'oral', and frequency is '2 hours'. The pharmacy is 'RITE AID-WEST CHESTER MALL - Cortlandt Town Center, Mohegan Lake, NY, 1054'. The 'Note to Pharmacist' field is highlighted and contains the text 'GHB treatment of narcolepsy'.
