Re-Designed Medications Page

WRS Health is pleased to announce the **preview** release of our re-designed Medications Page. This release is in compliance with migration to the National Council of Prescription Drug Programs (NCPDP) SCRIPT Standard v2017071.

The re-designed Medications Page has a more streamlined look with Current Medications, Patient Reported Medications, and Previous Prescriptions displayed in the right-hand side. All other tabs are on the left-hand side. Get Eligibility and Drug History and Medication Transactions buttons are at the bottom of the screen.

Current Note Prescriptions
 No current note prescriptions found.

Add Prescription / Medication
 Drug : Add S

Drugs most frequently selected by you in this practice.
Medications missing? Due to a recent update to the National Drug Database, some items may appear to be "missing" from your list. Simply search and add the medication. Using this updated information will eventually populate your list for future use.

Current Allergies

Patient denies drug allergies or adverse reactions

Add Allergy Reconcile

- ^ Allergies Reported by Patient
- ^ Inactive Allergies
- ^ Archived Medications
- ^ Deleted Medications
- ^ Drug Histories

Add Prescription / Medication Page View

We have also changed the layout of the Add Prescription / Medication Page for a more compact look. "Qualifier" has been **renamed** to "Unit of Measure" in compliance with SureScripts. Adding an ICD code will also trigger a Secondary ICD Code box to appear in case a user needs to add another code.

Add Prescription / Medication
 Drug : S

Dose:

Route:

Every: hours times/day other freq/interval

For: days

Quantity: **Unit of Measure:**

Additional Instructions:
