Re: WRS Health System Update

The WRS Development Team will be performing an update on or about February 28, 2014. This release will include the following:

EMR Note Search

Functionality has been added to search a patient chart for any code, word or term. Simply select **EMR All Note** and a **Search Note** section is now found at the top of the page. Enter the search parameters (**Date Range**, **Signed By**, **Assessment**, **Note Type**, **Note Text**) and press **Search**. Any notes within that chart that contain the entered search criteria will be displayed below the **Search Note** box:

The screenshot shows the EMR interface with search filters and a table of results. The search filters include Date Range (2/1/2014 to 2/28/2014), Signed by (Any), Assessment (786.50), and Note Type (Any). The table below shows a single result for a note dated Feb 15, 2014, with an assessment of 786.50. The assessment text includes: UNSPECIFIED CHEST PAIN (786.50), TRANSIENT HYPERTENSION OF PREGNANCY, UNSPECIFIED AS TO EPISODE OF CARE (642.30), Anemia in chronic kidney disease (285.21), PANIC DISORDER WITHOUT AGORAPHOBIA (300.01), OPIOID TYPE DEPENDENCE, and UNSPECIFIED USE (304.00). The table also has columns for Date, Type of note, Signature, Drop, and Fax.
