Re:	Updates to the WRS Health System

WRS Health is proud to announce the release of several new features created from the continued feedback and requests of our user community. Below is an explanation of new and updated items, along with directions for use.

Items in this Release (Click to View)

Prescribe on Behalf of (POBO)

New functionality has been added that allow a **Prescribing Provider** ("provider") to delegate the task of responding to electronic medication refills to another staff member by officially designating them as their **Prescribing Agent** ("agent").

Why It's Important?

Prescribe on Behalf of allows frequent and repetitive medication refill tasks to be removed from the provider's workload and formally be handled by a supporting team member. When used in conjunction with practice refill protocols the function may save provider time and increase efficiency in the medication refill process.

General	Permission	Resource Restrictions	Schedule	Universities	Medical Schools
Professiona	l Organizations	Hospital Affiliates	Academic Ap	pointments	Electronic Routing
Electronic	Routing Set	up			
Electronic	Routing Set	up			
Prescribe	e On-Behalf-Of	up .			

Setup & Workflow

To enable this function the provider needs to perform a one-time step to authorize another user as their agent. This authorization then allows the user to view and respond to electronic medication refill tasks in their own refill queue that were originally only available to the provider.

To setup an agent, the provider must go to **Resource Management>[User Name]>Electronic Routing>Prescribing Agent** and select the agent from the dropdown list of practice users. The agent does not need to have an active DEA Number to be selected. Note that currently a provider can have only one agent at a time this may be expended in the future.

ur	Test Doc	
	TEST, J	
	Test, Kenny	
	Test, Kylene	

In addition, any practice user can be selected as a agent by multiple providers.

A popup legal disclaimer is triggered when the provider selects an agent. The provider must accept the disclaimer to finalize the selection of their agent.

A record of this designation is then shown under the prescriber's **Electronic Routing** tab and on the agent's **Permissions** tab in **Resource Management**.

UN-BEHALF-OF PRESCRIBING AGENTS	
Admin Test is the prescribing agent of Dr. D	oc Test, enabled on 06/06/2019 10:48
Admin Test is the prescribing agent of Dr. D	oc Test, enabled on 06/06/2019 10:48

Upon designation, the agent can view and act on all refill requests sent to the provider's Task Queue. Following all established practice refill protocols, the agent can respond appropriately to each request from a pharmacy. The electronic request can only be modified to address number of refills allowed.

The agent can **Save** and **Send** to accept the refill and electronically send the prescription "as is" to be refilled. The agent can also **Deny** a refill request if it does not meet with practice protocols. Deny will halt the refill request and allow the practice to address the reason. Once the refill has been **Accepted** or **Denied** and **Sent**, the provider can view all completed requests in their task queue and open any request to view the prescription in its entirety.

Note

WRS Health strongly advises that "Prescribe on-Behalf-of" (POBO) is used in conjunction with well-defined practice refill guidelines, directions, and protocols. All Prescribing Agents should be well-versed in these protocols and should be well-versed in the prescription refill process.

Your Feedback is Needed

During initial release **Prescribe on Behalf Of** is restricted to handle electronic refill requests only. In addition, prescribing providers can select only one agent. However, an agent may be assigned to more than one provider. WRS Health will not be implementing this module to EPCS (controlled medication) prescriptions or refill requests. Also, there is a limit of one agent per prescriber. This limit may be increased to multiple agents per provider in the future based on feedback from the user community.

We are looking to the entire WRS Health Provider community to help guide us in the future enhancement of this feature. Please let us know what you think, and we will ensure that all ideas will be discussed.

		1

ELECTRONIC REFILL LOGS

WRS Health implemented functionality last year to address electronic Change and Cancel actions for Prescriptions. Along with these modules, the process for tracking electronic Refill Requests was enhanced as well.

Current Medications	Medication : o	omeprazole 40 mg capsu	le,delayed relo
Flexeril 5 mg tablet & no refills E	Date	Action	Outcome
omeprazole 40 mg capsule,del Take 1 capsule(s) by ORAL route , 1	07/05/2019 11:24:AM	Route REFRES	Success
Reconcile Move To	07/04/2019 10:10:AM	Receive REFREQ	Success
ADD PRESCRIPTION / MEDICATION Drug :	04/29/2019 12:53:PM	Reconcile	Success
	04/29/2019 12:53:PM	Moved to Current Medications	Success
Drugs most frequently selected by you prednisone 5 mg tablet	03/11/2019 1:26:PM	Route NEWRX	Success
 clarithromycin 500 mg tablet azelastine 137 mcg (0 1 %) nasa 	03/11/2019 1:26:PM	Prescription created	Success
A fluticasone pronionate 50 mcg/ar	And Antoma Antonia		

Electronic requests that have been approved/denied through the electronic module, via the task queue, by the provider will add in the next newly opened note, to the Medication Page>Previously Prescribed Medications and to the ORIGINAL prescribed medication. The action will be queued and can be accessed by the VIEW ALL ACTIONS module:

PRE	VIOUS PRESCRIPTIONS/ CURRENT	MEDICATIONS		
	Previously Prescribed Medica	Actions		
	fluticasone propionate 50 mcg/a Inhale 2 sprav(s) by Intranasal ru	Medication	: fluticasone propionate 50	mcg/actuatio
Rep	mescribe Move To	Date	Action	Outcome
	Current Medications	06/07/2019 10:57:AM	Receive REFRES Confirmation from Pharmacy	Success
٥	Tylenol 325 mg tablet Take 2 tablet(s) by oral route , ev	06/07/2019 10:57:AM	Route REFRES	Success
	fluticasone propionate 50 m Inhale 2 spray(s) by Intranasal re	06/06/2019 3:09:AM	Receive REFREQ	Success

There may be instances where an electronic refill request does not have an "original" prescription within the EHR platform (ie: original prescription was called

into the pharmacy and not documented in the EHR; the original prescription was sent from a different facility or EHR, like a clinic or hospital). The electronic refill request, if approved/denied through the electronic module, via the task queue, by the provider will still add in the next newly opened note, to the Medication Page>Previously Prescribed Medications, but will be as a stand-alone prescription. The action will be queued and can be accessed by the VIEW ALL ACTIONS module:

Ų

DRUG HISTORY

As a review, patient drug history can be accessed electronically if all the following steps have been completed, and as presented by the patient's PBM coverage. At this time, the history can only be obtained for patients that have this type of Pharmacy coverage.

- Make sure that the patient has signed the consent from Patient
 Management> Directive> Consents>Drug History Consent
- 2.) Make sure PBM coverage is verified which is done with a pending visit
- 3.) The verification process, through a scheduled appointment, will populate the drug history under Patient Management>Medications>Drug History and under the Drug History heading on the Medications Page.
- 4.) You can also manually attempt to obtain the eligibility and history within the note process: patient's note> medications page. Click get ELIGIBILITY and DRUG HISTORY button.

Certain information may not be available or accurate in this report, including over-the-counter medications, low-cost prescriptions, prescriptions paid for by the patient or non-participating sources, or errors in insurance claims information. The provider should independently verify medication history with the patient.
